

Dear Members of the Judiciary Committee,

I support HB-6355. It would strengthen our current Extreme Risk Protective Order by including family members, members of a household and certain medical professional who could seek court action to keep guns out of the hands of dangerous people. It would also extend protection to dating partners, like my friend's daughter who was murdered by her abusive dating partner. She might be alive today if her complaints were not ignored by police and she had been able to seek protection under HB-6355.

Please support HB-6355.

Sincerely,

Karen Fischer

New London, CT
